Features: The Kodiak Accessory kit features 3 new heads designed to make stabilization easier. The Conical Point head can be driven into sheet metal with the deadblow hammer. This allows the Kodiak to be placed on fenders, doors, roofs or anywhere a heavy sheet metal “skin” can be punctured. The Chain Wedge head allows the Kodiaks to be used with the HD #2 chain kit or any 3/8” chain and hook assembly. The V-head allows the Kodiaks to be placed more securely along rails and frames of overturned vehicles.
